DETAILED ACTION

Allowable Subject Matter

Claims 41-47, 57 and 59-61 are allowed over the prior art of record as amended in the 12/14/2009 reply.

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed reinforcing member adapted or configured for use in a medical device. The device includes providing one or more structural elements adapted and configured for creating the reinforcing member, the one or more structural elements including a surface having a portion with an initial surface area, and treating at least the portion of the surface of the one or more structural elements to provide a final surface area that is greater than the initial surface area. The one or more structural elements are used in creating the reinforcing member. The reinforcing member can then be incorporated into the structure of the medical device.

The closest prior art of record is Cohen (USPN5,330,521) and Parisi et al. (US2001/0027310), however these references do not disclose the device as claimed or described above.

Regarding claims 41 and 59, the closest prior art of record fails to teach among all the limitations or render obvious the specifics of the one or more metallic filaments that are treated to provide an adjusted surface area.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
